## What is claimed is:

1. A body frame of a vehicle, comprising:

a frame member provided in one of a front portion and a rear portion of the vehicle; and

a load imposing device, provided at an end of the frame member, for imposing a load on the frame member toward at least two opposite directions which are substantially perpendicular to a longitudinal direction of the frame member, when impact on the frame member is anticipated or imposed.

10

- 2. A body frame as claimed in claim 1, wherein the load imposing device has a member made of a shape memory alloy.
- 3. A body frame as claimed in claim 1, wherein the load imposing device has a spring.
  - 4. A body frame as claimed in claim 3, wherein the spring is one of a coil spring and a plate spring.
- 5. A body frame as claimed in claim 1, wherein the load imposing device has a band-shaped member made of a shape memory alloy, which is wound along one of an outer-peripheral wall and an inner-peripheral wall of the frame member.
